LAB SHEET - 5

1. *Develop a personal profile webpage using HTML, CSS, and JavaScript. Include name, photograph, education, skills, hobbies, and contact information.*

Ans 1.

```
<style>
   .card { border: 1px solid #ccc; padding: 15px; width: 300px; font-family: Arial; }
   .card img { width: 100px; height: 100px; border-radius: 50%; }
</style>

<div class="card">
   <img src="profile.jpg" alt="Profile Photo">
   <h2>Sadvansh Chauhan</h2>
   <p><b>Education:</b> BCA 3rd Semester</p>
   <p><b>Skills:</b> HTML, CSS, JavaScript, C++</p>
   <p><b>Hobbies:</b> Fitness, Coding, Gaming</p>
   <p id="contactInfo" style="display:none;"><b>Email:</b>
vansh@example.com</p>
   <button onclick="toggleContact()">Show Contact</button>
</div>

<script>
   function toggleContact() {
      let c = document.getElementById("contactInfo");
      c.style.display = (c.style.display === "none") ? "block" : "none";
   }
</script>
```

2*. Develop a static College Website containing Home, About Us, Courses, Faculty, Gallery, and Contact Us sections. Use CSS for design and JavaScript for at least one interactive feature.*

Ans 2.

```
<style>
  nav a { margin: 10px; text-decoration: none; font-weight: bold; }
  section { padding: 15px; border-bottom: 1px solid #ddd; }
</style>

<nav>
  <a href="#home">Home</a> | <a href="#about">About Us</a> | <a href="#courses">Courses</a> |
  <a href="#faculty">Faculty</a> | <a href="#gallery">Gallery</a> | <a href="#contact">Contact Us</a>
</nav>

<section id="home"><h1>Welcome to College Portal</h1></section>
<section id="about"><h2>About Us</h2><p>Premier education institute.</p></section>
<section id="courses"><h2>Courses</h2><p>BCA, B.Tech, MCA, MBA</p></section>
<section id="faculty"><h2>Faculty</h2><p>Experienced academic mentors.</p></section>
<section id="gallery"><h2>Gallery</h2><p>Campus and event images.</p></section>
<section id="contact">
  <h2>Contact Us</h2>
  <button onclick="alert('Contact: admissions@college.edu | Phone: +91 9876543210')">View Phone & Email</button>
</section>
```

3. Create a static restaurant webpage displaying restaurant information, menu, food images, prices, and contact details. Use CSS for styling and JavaScript to implement an interactive button or menu.

Ans 3.

```
<style>
  .menu-item { border: 1px solid #ddd; margin: 10px 0; padding: 10px; width: 250px; }
</style>

<h1>Spice Villa Restaurant</h1>
<p>Authentic Delicious Food | Ph: 9876543210</p>

<div class="menu-item">
  <h3>Paneer Butter Masala</h3>
  <p>Price: Rs. 240</p>
  <button onclick="orderItem('Paneer Butter Masala')">Order Now</button>
</div>
<div class="menu-item">
  <h3>Veg Biryani</h3>
  <p>Price: Rs. 180</p>
  <button onclick="orderItem('Veg Biryani')">Order Now</button>
</div>
<div id="orderStatus"></div>

<script>
  function orderItem(name) {
    document.getElementById("orderStatus").innerHTML = "<br><b>Order Placed:</b> " + name;
  }
</script>
```

4*. Create a personal portfolio website using HTML, CSS, and JavaScript. Include Home, About, Education, Skills, Projects, and Contact sections with proper navigation.*

Ans 4.

```
<style>
  body { font-family: sans-serif; line-height: 1.5; }
  header { background: #222; color: #fff; padding: 10px; }
  header a { color: #fff; margin-right: 15px; text-decoration: none; }
  section { padding: 10px 0; }
</style>

<header>
  <a href="#home">Home</a><a href="#about">About</a><a href="#edu">Education</a>
  <a href="#skills">Skills</a><a href="#projects">Projects</a><a href="#contact">Contact</a>
</header>

<section id="home"><h1>Hi, I'm Vansh</h1><p>Frontend Developer</p></section>
<section id="about"><h2>About</h2><p>Passionate coder and software enthusiast.</p></section>
<section id="edu"><h2>Education</h2><p>BCA - 3rd Semester</p></section>
<section id="skills"><h2>Skills</h2><p>JavaScript, C++, HTML, CSS</p></section>
<section id="projects"><h2>Projects</h2><p>Web Development Lab Sheets, Management Systems</p></section>
<section id="contact">
  <h2>Contact</h2>
  <button onclick="alert('Portfolio message sent!')">Send Message</button>
</section>
```

5. ***Create a webpage using HTML and CSS and add JavaScript functionality such as button click events, image change, text change, date/time display, or form validation.***

Ans 5.

```
<h2 id="demoText">JavaScript Interactivity Demo</h2>

<button onclick="changeText()">Change Text</button>

<button onclick="showTime()">Show Date/Time</button>

<button onclick="toggleImage()">Toggle Image</button>

<br><br>

<img id="myImg" src="img1.jpg" width="120" height="120" alt="Sample"
style="border:1px solid #ccc; display:block;">

<p id="timeOutput"></p>

<script>

  function changeText() {

    document.getElementById("demoText").innerText = "Text changed
successfully!";

  }

  function showTime() {

    document.getElementById("timeOutput").innerText = "Current Time: " + new
Date().toLocaleTimeString();

  }

  function toggleImage() {

    let img = document.getElementById("myImg");

    img.src = (img.src.includes("img1.jpg")) ? "img2.jpg" : "img1.jpg";

  }

</script>
```

6. ***Develop a complete Online Book Store website containing Home Page, Book Catalogue, Book Details, Registration/Login, and Shopping Cart / Contact Page.***

Ans 6.

```
<style>
   body { font-family: Arial, sans-serif; margin: 15px; }
   nav a { margin-right: 10px; text-decoration: none; font-weight: bold; }
   .page-section { border: 1px solid #ccc; padding: 15px; margin-top: 15px; }
   table { width: 100%; border-collapse: collapse; margin-top: 10px; }
   th, td { border: 1px solid #ccc; padding: 8px; text-align: left; }
</style>

<nav>
   <a href="#home">Home</a> | <a href="#catalogue">Catalogue</a> | <a
href="#auth">Login/Register</a> |
   <a href="#cart">Cart</a> | <a href="#contact">Contact</a>
</nav>

<!-- Home Page -->
<div id="home" class="page-section">
   <h1>KitabGhar Book Store</h1>
   <p>Welcome to the online catalogue of programming and academic books.</p>
</div>

<!-- Book Catalogue -->
<div id="catalogue" class="page-section">
   <h2>Book Catalogue</h2>
   <table>
      <tr><th>ID</th><th>Book
Name</th><th>Author</th><th>Price</th><th>Action</th></tr>
      <tr><td>B01</td><td>Web Technologies</td><td>A. Kumar</td><td>Rs.
450</td><td><button onclick="addToCart('Web Technologies', 450)">Add to
Cart</button></td></tr>
```

```
      <tr><td>B02</td><td>Core Java</td><td>Herbert S.</td><td>Rs. 650</td><td><button onclick="addToCart('Core Java', 650)">Add to Cart</button></td></tr>
      <tr><td>B03</td><td>Python Basics</td><td>M. Lutz</td><td>Rs. 500</td><td><button onclick="addToCart('Python Basics', 500)">Add to Cart</button></td></tr>
    </table>
</div>

<!-- Registration and Login -->
<div id="auth" class="page-section">
    <h2>User Login & Registration</h2>
    <form onsubmit="event.preventDefault(); alert('Form Submitted');">
        <input type="text" placeholder="Username" required>
        <input type="password" placeholder="Password" required>
        <button type="submit">Login</button>
        <button type="reset">Reset</button>
    </form>
</div>

<!-- Cart and Contact -->
<div id="cart" class="page-section">
    <h2>Shopping Cart</h2>
    <div id="cartList">Cart is empty.</div>
</div>

<div id="contact" class="page-section">
    <h2>Contact Us</h2>
    <p>Email: store@kitabghar.com | Phone: 9876543210</p>
</div>
```

```
<script>
    let cartTotal = 0;
    function addToCart(item, price) {
        cartTotal += price;
        document.getElementById("cartList").innerHTML = "Added: <b>" + item +
"</b> | Total Bill: Rs. " + cartTotal;
    }
</script>
```
